Haarslev Industries Process Deliveries;
Declaration of Conformity with International Standards

About Haarslev Industries:

Haarslev Industries produces process equipment for customers in the fishmeal and oil industry, for the meat processing industry, the pet food industry, and processing plants for environmentally friendly biofuels. We deliver complete plants and equipment for these industries all over the world.

The facilities' durability, reliability and excellent service are key words for our deliveries. Either it is pure equipment deliveries, or as a complete turnkey facility.

Haarslev Industries' history in the fishmeal & oil industry and oil goes back many decades. We possess extensive experience and extensive know-how in designing processing plants for fishmeal and oil and can offer a unique and second to none equipment program. Our plant solutions are known for its superior energy efficiency, reliability, safety, and compliance with local environmental requirements.

We have in-house engineering and production facilities in Europe, Americas, and Asia. We are the preferred supplier to the world's major fishmeal producers and are represented globally through our own offices and agent network.

About Haarslev Industries' offered process delivery to Vardin Pelagic:

We have offered a complete processing plant consisting of two separate process lines for Vardin Pelagic. The offered delivery is based on our extensive knowledge for such process plants. In our design, we have placed great emphasis on high raw material yield, quality of the finished products, reliability, and low energy consumption as well as operation and maintenance-friendly solutions.

We hereby confirm that the offered delivery is in accordance with the best available process technology for the industry, known as BAT. Ref. EPA «BAT Guidance Note on Best Available Techniques for the Manufacture of Fish Meal & Fish Oil»
